CORE BUSINESS VERTICALS

Multidisciplinary infrastructure capabilities

RSIPL INDIA operates as a diversified infrastructure and EPC organisation across connected project verticals — demonstrating execution-focused capability rather than a single-service contractor.

Power Transmission & OPGW

EHV transmission line construction, tower foundations, erection, conductor stringing, and OPGW installation.

[Learn More →](#)

Power Distribution

11kV/33kV distribution networks, rural electrification, and network strengthening for DISCOMs.

[Learn More →](#)

Government & Defence Infrastructure

Civil, electrical, and telecom infrastructure for high-responsibility government and defence environments including BSF project experience.

[Learn More →](#)

Renewable Energy

Solar, wind, hybrid, and BESS infrastructure with grid connectivity and power evacuation.

[Learn More →](#)

EPC Project Delivery

Engineering, procurement, construction management, testing, commissioning, and O&M.

[Learn More →](#)

Mobile Tower / Telecom Infrastructure

Mobile tower infrastructure, civil tower-site support, electrical works, and O&M support.

[Learn More →](#)

Interior Project Solutions

Project-scale interior materials, supply, installation, and execution for commercial, institutional, and government projects.

[Learn More →](#)

AIS/GIS Substations — New Diversification

Strategic expansion into AIS and GIS substation infrastructure through specialised technical and project execution teams.

[Learn More →](#)

GOVERNMENT & DEFENCE EXPERIENCE

Infrastructure execution for high-responsibility environments

Government and defence-related projects demand execution discipline, controlled mobilisation, safety, documentation, and dependable site coordination.

BSF PROJECT EXPERIENCE

Civil Infrastructure

Civil works including site preparation, foundations, and structural construction.

Bunker Construction

Bunker construction and associated bunker civil works.

Electrical Works

Electrical infrastructure installation and integration.

Mobile Tower Infrastructure

Mobile tower and telecom infrastructure support.

NEWLY DIVERSIFIED CAPABILITY

Expanding into AIS & GIS Substation Projects

RSIPL India is expanding its power infrastructure capabilities into AIS and GIS substation projects by leveraging specialised technical and project execution teams. This strategic expansion is designed to support a broader project lifecycle, integrating line and substation capability.

Our diversification is supported by specialised technical teams, experienced project professionals, engineering coordination capability, project execution resources, and strategic expansion into substation infrastructure.

WHY RAMSANG

Built for multidisciplinary project execution

Project Execution Orientation

Execution-focused delivery with milestone-driven planning and daily progress tracking.

Multidisciplinary Capability

Power, civil, telecom, renewable, and interior capabilities under one organisation.

Government / Large Project Exposure

Experience with government, PSU, and high-responsibility project environments.

Remote Site Mobilisation

Proven ability to mobilise teams and resources to remote and challenging project sites.

Power + Civil + Telecom Capability

Integrated capability across power transmission, civil infrastructure, and telecom.

Technical Coordination

Engineering-led coordination across disciplines, vendors, and stakeholders.

Safety Culture

Zero-harm commitment embedded in site planning, supervision, and daily toolbox talks.

Quality Control

ITP-aligned inspection, material traceability, and audit-ready documentation.

Responsive Leadership

Direct access to leadership for decision-making and escalation.

Diversified Execution Model

Mixed delivery model spanning EPC, supply, and consulting across multiple verticals.

PROJECT EXPERIENCE

Execution across connected infrastructure verticals

RSIPL INDIA's project experience spans power transmission, OPGW, government and defence, civil, electrical, telecom, renewable energy, and interior project solutions.

About RSIPL INDIA

Ramsang Infrastructure Pvt Ltd is a diversified Indian infrastructure and EPC organisation delivering multidisciplinary project capabilities across power transmission, OPGW, civil infrastructure, renewable energy, government projects, telecom infrastructure, and project-scale interior solutions.

OUR STORY

Engineering infrastructure with responsibility

RSIPL INDIA was founded with a vision to bridge India's infrastructure gap through disciplined, multidisciplinary execution. From early engagements in power transmission and civil infrastructure, the company has grown into a diversified organisation capable of handling complex projects across multiple connected verticals.

Our growth trajectory has been shaped by a commitment to execution discipline, safety, and compliance. We have progressively expanded capabilities across power distribution, renewable energy, mobile tower and telecom infrastructure, government and defence infrastructure, and project-scale interior solutions — building a mixed delivery model that combines EPC services, material supply, and consulting.

RSIPL has project experience working for and in connection with BSF infrastructure requirements, delivering civil works, bunker construction, electrical works, and mobile tower infrastructure support. This experience demonstrates our capability to execute in high-responsibility government and defence environments with controlled mobilisation and safety discipline.

Our commitment to quality is reflected in audit-ready documentation, safety-first site culture, and alignment with industry standards. We continue to invest in engineering capacity, safety infrastructure, and diversified capabilities to support India's national development goals.

[Home](#) > [About](#) > [Chairman's Message](#)

Chairman's Message

A vision for disciplined, multidisciplinary infrastructure execution across India.

Infrastructure is the backbone of a nation's progress. At Ramsang Infrastructure Pvt Ltd, we have built our organisation on a simple principle: execute with discipline, deliver with safety, and maintain integrity in every project interaction.

India's infrastructure needs are growing rapidly — across power transmission, distribution, renewable energy, government projects, telecom, and the built environment. We recognised early that a single-service contractor model would not meet the scale and complexity of these requirements. That is why RSIPL has evolved into a diversified organisation with multidisciplinary capabilities.

Our experience working in connection with BSF infrastructure requirements has reinforced our belief that high-responsibility environments demand more than technical capability — they demand controlled mobilisation, documentation discipline, and dependable site coordination. We bring this same rigour to every project we undertake.

As we expand into AIS and GIS substation infrastructure through specialised technical teams, we remain committed to honest positioning. We will never claim experience we have not earned. Instead, we invest in the teams, engineering coordination, and execution resources needed to deliver on our commitments.

I invite you to partner with RSIPL INDIA — an organisation built for serious infrastructure execution, driven by a responsive leadership team, and committed to powering India's progress responsibly.

Mr. R. P. Adhikari

Why Ramsang

RSIPL INDIA is developing as a multidisciplinary infrastructure organisation — combining power, civil, telecom, renewable, government, and interior capabilities with disciplined execution.

OUR DIFFERENTIATORS

Why clients partner with RSIPL INDIA

Government & PSU Expertise

Deep understanding of tender processes, compliance requirements, and public sector procurement frameworks — built through engagement with state and central utilities.

Integrated Delivery Model

EPC, material supply, and consulting under one coordination cell — reducing interface risk and shortening project timelines for clients.

Remote Site Mobilisation

Proven ability to mobilise teams and resources to remote and challenging project sites with dedicated site teams.

Compliance-First Approach

All work aligned with industry standards and state grid codes — supported by audit-ready documentation throughout the project lifecycle.

Experienced Leadership

A responsive leadership team with direct access for decision-making and escalation across all project verticals.

End-to-End Lifecycle Support

From feasibility and design through procurement, construction, commissioning, and long-term O&M.

BSF / Defence Project Experience

Project experience working in connection with BSF infrastructure requirements including civil, bunker, electrical, and telecom works.

Safety Culture

Zero-harm commitment embedded in site planning, supervision, and daily toolbox talks across all project environments.

EXECUTION STRENGTHS

Ten reasons clients choose RSIPL INDIA

Project Execution Orientation

Execution-focused delivery with milestone-driven planning and daily progress tracking.

Multidisciplinary Capability

Power, civil, telecom, renewable, and interior capabilities under one organisation.

Government / Large Project Exposure

Experience with government, PSU, and high-responsibility project environments.

Remote Site Mobilisation

Proven ability to mobilise teams and resources to remote and challenging project sites.

Power + Civil + Telecom Capability

Integrated capability across power transmission, civil infrastructure, and telecom.

Technical Coordination

Engineering-led coordination across disciplines, vendors, and stakeholders.

Safety Culture

Zero-harm commitment embedded in site planning, supervision, and daily toolbox talks.

Quality Control

ITP-aligned inspection, material traceability, and audit-ready documentation.

Responsive Leadership

Direct access to leadership for decision-making and escalation.

Diversified Execution Model

Mixed delivery model spanning EPC, supply, and consulting across multiple verticals.

Power Transmission EPC

End-to-end EPC delivery for EHV transmission lines — from route survey and tower foundations to conductor stringing, OPGW installation, and commissioning.

OVERVIEW

What RSIPL INDIA delivers

RSIPL INDIA provides EPC services for high-voltage transmission infrastructure, covering route planning, tower foundations, erection, conductor stringing, OPGW installation, and associated civil works for state and central utilities across India.

What We Offer

- ✓ EHV transmission line construction with route survey and tower spotting
- ✓ Tower foundation, erection, and stub setting with strict alignment controls
- ✓ Conductor stringing and sagging using tension stringing equipment
- ✓ OPGW installation, jointing, and commissioning support for communication and protection
- ✓ Testing, commissioning, and route documentation
- ✓ Associated civil and electrical infrastructure works

KEY BENEFITS

Why clients choose this capability

Integrated Delivery

Engineering, procurement, and construction under one coordination cell.

Safety Compliance

Permit systems, PPE, and work-at-height controls on every site.

Tower Foundation

Precision foundation construction for transmission towers — excavation, concreting, and stub setting with strict alignment controls.

OVERVIEW

What RSIPL INDIA delivers

RSIPL INDIA constructs tower foundations for EHV transmission lines, including site preparation, excavation, concreting, stub setting, and backfilling with alignment tolerances aligned to tower design specifications.

What We Offer

- ✓ Foundation excavation and site preparation for various tower types
- ✓ Concrete pouring and curing with quality-controlled mix designs
- ✓ Stub setting and alignment with precision survey equipment
- ✓ Backfilling and site restoration
- ✓ Foundation type selection based on soil investigation
- ✓ Documentation of foundation records and ITP compliance

KEY BENEFITS

Why clients choose this capability

Site Expertise

Experienced foundation teams across diverse soil and terrain conditions.

Safety Discipline

Excavation safety, shoring, and confined space controls.

Tower Erection

Safe and efficient assembly and erection of transmission towers — from stub assembly to final torque checks.

OVERVIEW

What RSIPL INDIA delivers

RSIPL INDIA handles transmission tower erection including member assembly, stub assembly, section erection, tightening and torque verification, and anti-corrosion treatment with work-at-height safety systems.

What We Offer

- ✓ Tower member assembly and erection for all tower configurations
- ✓ Stub assembly and initial section erection
- ✓ Bolting, tightening, and torque verification
- ✓ Anti-corrosion treatment and touch-up
- ✓ Work-at-height safety systems and permit controls
- ✓ Erection sequence planning and crane / derrick coordination

KEY BENEFITS

Why clients choose this capability

All Tower Types

Self-supporting, guyed, and narrow-base tower configurations.

Height Safety

Permit-to-work systems, fall protection, and daily toolbox talks.

Conductor Stringing

Tension stringing of conductors and earth wire — pulling, sagging, clipping, and vibration damper installation.

OVERVIEW

What RSIPL INDIA delivers

RSIPL INDIA executes conductor stringing using tension stringing methods, including pilot wire installation, pulling, tensioning, sagging, clipping, and vibration damper installation with sag charts and tension calculations.

What We Offer

- ✓ Tension stringing of conductors and earth wire
- ✓ Pilot wire installation and pulling operations
- ✓ Sagging and tension adjustment per design sag charts
- ✓ Clipping and binding at suspension and tension towers
- ✓ Vibration damper and spacer installation
- ✓ Jointing and mid-span joint compression

KEY BENEFITS

Why clients choose this capability

Tension Method

Controlled tension stringing to protect conductor surface and joints.

Crossing Safety

Guard structures and road / canal crossing protection.

Sag Accuracy

Sag charts and tension calculations for correct installation.

Quality Records

Joint records, sag records, and tension verification documentation.

OPGW Installation

Optical Ground Wire stringing, jointing, splicing, testing, and commissioning support for transmission communication and protection networks.

OVERVIEW

What RSIPL INDIA delivers

RSIPL INDIA provides specialised OPGW installation services including stringing, jointing, splicing, fibre testing, and commissioning support for transmission corridors. Our teams handle transmission route mobilisation and fibre integration with state communication backbones.

What We Offer

- ✓ OPGW stringing with specialised tension stringing equipment
- ✓ Jointing and splicing of optical fibres
- ✓ Fibre continuity and OTDR testing support
- ✓ Commissioning support and integration with communication networks
- ✓ Transmission route mobilisation for remote corridors
- ✓ OPGW termination and earthing at substation ends

KEY BENEFITS

Why clients choose this capability

Specialised Equipment

Dedicated OPGW stringing and splicing equipment and tools.

Fibre Protection

Controlled handling to prevent fibre damage during installation.

Route Mobilisation

Proven ability to mobilise teams to remote transmission corridors.

Testing Rigour

Power Distribution Network

11kV/33kV distribution network construction, rural electrification, and network strengthening for DISCOMs and state utilities.

OVERVIEW

What RSIPL INDIA delivers

RSIPL INDIA constructs and strengthens power distribution networks including 11kV and LT line construction, distribution transformer erection, service connections, and network strengthening for DISCOMs and state electricity boards.

What We Offer

- ✓ 11kV and 33kV distribution line construction
- ✓ Distribution transformer erection and installation
- ✓ LT line construction and service connections
- ✓ Rural electrification and household connections
- ✓ Network strengthening and feeder separation
- ✓ Consumer indexing and documentation

KEY BENEFITS

Why clients choose this capability

Network Expertise

Distribution line construction and DT installation across rural and urban networks.

Safety Compliance

Work practices aligned with electrical safety regulations.

Programme Delivery

Milestone-driven execution for government electrification programmes.

Documentation

Consumer indexing and as-built documentation for O&M handover.

NEWLY DIVERSIFIED BUSINESS VERTICAL

AIS & GIS Substation Project Capability

Ramsang Infrastructure Pvt Ltd is strategically expanding into AIS and GIS substation infrastructure through specialised technical and project execution teams capable of supporting engineering coordination, installation, civil integration, testing and commissioning requirements.

NEWLY DIVERSIFIED CAPABILITY

Engineering-led expansion into substation infrastructure

RSIPL India is expanding its power infrastructure capabilities into AIS and GIS substation projects through specialised technical and project execution teams. This diversification is supported by specialised team capability, project readiness, engineering coordination, and strategic expansion into substation infrastructure.

AIR INSULATED SUBSTATIONS

AIS — Air Insulated Substation Capability

Engineering coordination, civil readiness, equipment installation, and commissioning support for outdoor air-insulated substation projects.

GAS INSULATED SUBSTATIONS

GIS — Gas Insulated Substation Capability

Engineering coordination, civil building readiness, GIS equipment installation, gas handling support, and commissioning for compact, indoor gas-insulated substation projects.

WHY THIS DIVERSIFICATION

Strategic expansion for integrated project delivery

Power transmission projects increasingly require integrated line and substation capability. RSIPL's expansion is designed to support a broader project lifecycle.

Integrated Line & Substation Capability

Power transmission projects increasingly require integrated line and

Broader Project Lifecycle

RSIPL's expansion is designed to support a broader project lifecycle

Specialised Technical Teams

Dedicated teams with substation engineering,

Engineering-Led Diversification

Strategic expansion through engineering

Important Positioning

RSIPL has not yet completed AIS/GIS substation projects as an established project portfolio. This capability represents a newly diversified business vertical supported by specialised technical teams, experienced project professionals, engineering coordination capability, and project execution resources. No completed AIS/GIS project cards or statistics are presented, as actual verified project evidence will be supplied as this vertical develops.

Discuss AIS & GIS Substation Requirements

Connect with our team to discuss substation project requirements and our diversification roadmap.

Renewable Energy EPC

Solar, wind, hybrid, and BESS infrastructure with grid connectivity and power evacuation support.

OVERVIEW

What RSIPL INDIA delivers

RSIPL INDIA supports renewable energy projects including solar, wind, hybrid, and battery energy storage infrastructure with grid connectivity, power evacuation, and balance of plant works. Our renewable capability is integrated with our transmission and civil infrastructure experience.

What We Offer

- ✓ Solar power project infrastructure and balance of plant
- ✓ Wind farm infrastructure and civil foundations
- ✓ Hybrid solar-wind project support
- ✓ BESS infrastructure and grid integration
- ✓ Grid connectivity and power evacuation infrastructure
- ✓ Associated civil and electrical works

KEY BENEFITS

Why clients choose this capability

Solar Expertise

Ground-mounted and rooftop solar infrastructure capability.

Wind Infrastructure

Wind farm civil foundations and electrical networks.

Storage Integration

BESS infrastructure and grid stabilization support.

Grid Connectivity

Power evacuation and grid integration infrastructure.

Solar Power Projects

Ground-mounted and rooftop solar infrastructure, module mounting structures, DC/AC electrical works, and grid evacuation.

OVERVIEW

What RSIPL INDIA delivers

RSIPL INDIA supports solar power projects with infrastructure including module mounting structure installation, DC string assembly, cable laying, inverter-transformer stations, and grid evacuation infrastructure.

What We Offer

- ✓ Ground-mounted solar infrastructure
- ✓ Rooftop solar system installation
- ✓ Module mounting structure fabrication and installation
- ✓ DC string assembly, cable laying, and trenching
- ✓ Inverter-transformer stations and evacuation infrastructure
- ✓ SCADA, weather monitoring, and commissioning support

KEY BENEFITS

Why clients choose this capability

Solar Infrastructure

Ground-mounted and rooftop solar project capability.

Safety Compliance

DC and AC electrical safety during installation.

Schedule Reliability

Phased execution aligned with solar season windows.

Quality Control

Module testing and cable insulation verification.

Wind & Hybrid Energy

Wind farm infrastructure, hybrid solar-wind projects, and grid integration support.

OVERVIEW

What RSIPL INDIA delivers

RSIPL INDIA supports wind and hybrid energy projects with civil foundations, internal electrical networks, evacuation infrastructure, and balance of plant works for wind turbine generators and hybrid facilities.

What We Offer

- ✓ Wind turbine generator foundations
- ✓ Internal electrical cable and overhead network
- ✓ Switchyard and metering station construction
- ✓ Hybrid solar-wind project infrastructure
- ✓ SCADA and remote monitoring integration
- ✓ Site restoration and access roads

KEY BENEFITS

Why clients choose this capability

Wind Infrastructure

WTG foundations and internal electrical network construction.

Hybrid Integration

Solar-wind hybrid project infrastructure support.

Cyclone-Safe Design

Foundations designed for cyclic loading and wind exposure.

Season Planning

Erection scheduled around wind and cyclone season windows.

Battery Energy Storage System (BESS)

Battery energy storage infrastructure, grid stabilization, peak shaving, and commissioning support.

OVERVIEW

What RSIPL INDIA delivers

RSIPL INDIA supports BESS projects with site preparation, containerised BESS installation, power conversion systems, switchyard integration, SCADA and EMS coordination, and commissioning support for grid stabilization and renewable evacuation.

What We Offer

- ✓ Containerised BESS site preparation and installation
- ✓ Power conversion system installation and integration
- ✓ Switchyard and transformer integration
- ✓ SCADA, EMS, and grid protection coordination
- ✓ Functional and performance testing support
- ✓ O&M documentation and training

KEY BENEFITS

Why clients choose this capability

Storage Expertise

Containerised BESS installation and integration capability.

Grid Stabilization

Peak shaving, frequency regulation, and renewable firming support.

Thermal Safety

Thermal management and cell-level monitoring for safe operation.

Commissioning Support

Grid code compliance testing and staged grid tests.

Health, Safety & Environment

Safety is not a compliance overhead — it is the foundation of every project we execute.

HSE FRAMEWORK

Eight pillars of our safety culture

Government and defence-related projects demand execution discipline and controlled mobilisation.

Our HSE framework ensures safety is embedded in the daily site rhythm.

Zero-Harm Culture

A commitment to zero lost-time incidents embedded in every project plan and site activity.

PPE & Site Safety

Personal protective equipment, work-at-height controls, and excavation safety on every site.

Hazard Identification

Daily hazard identification, risk assessment, and permit-to-work systems.

Toolbox Talks

Daily toolbox talks and safety briefings before all site activities.

Safety Documentation

Safety plans, incident records, and audit-ready HSE documentation.

Site Supervision

Dedicated safety supervisors monitoring compliance across all work fronts.

Safety Audits

Regular independent safety audits and corrective action tracking.

Environmental Care

Responsible construction practices to minimise environmental impact.

HIGH-RESPONSIBILITY ENVIRONMENTS

Safety discipline for government and defence projects

Safety-first project delivery

Discuss your project requirements with our HSE-aware team.

Quality Assurance

Audit-ready documentation and compliance-first quality control across every project lifecycle stage.

QA FRAMEWORK

Quality embedded in every project stage

Government clients increasingly evaluate partners on quality non-conformance trends. Our QA framework ensures inspection, traceability, and documentation are part of the daily site rhythm.

ITP-Aligned Inspection

Inspection test plans aligned with project specifications and utility requirements.

Material Traceability

Material records, batch tracking, and quality verification from supplier to site.

Non-Conformance Management

Non-conformance reports, corrective actions, and punch-list closure tracking.

Standards Compliance

Work aligned with CEA regulations, BIS standards, and state grid codes.

Documentation Cell

Dedicated documentation cell maintaining daily quality records.

Independent Audits

Regular quality audits and milestone certification support.

DOCUMENTATION DISCIPLINE

Audit-ready records for government and PSU clients

Quality-controlled project delivery

Build Infrastructure. Build Your Career.

RSIPL INDIA hires engineers, project managers, safety professionals, and procurement specialists to deliver multidisciplinary infrastructure projects across India.

CULTURE

An execution-led culture built on safety and quality

We foster a collaborative, safety-first environment where engineers and project professionals grow through hands-on delivery of complex infrastructure projects across power, civil, telecom, renewable, and interior verticals.

Meaningful Projects

Work on power, government, telecom, renewable, and interior projects that power India's growth.

Pan-India Exposure

Gain experience across diverse project environments and remote site locations.

Growth Pathways

Structured progression from site engineering to project leadership.

OPEN POSITIONS

Current opportunities

Senior Electrical Engineer — Power Transmission

 Pan-India Site  8+ years

- Lead transmission line and substation engineering
- Coordinate with site teams and clients

Privacy Policy

RSIPL INDIA is committed to protecting the privacy and security of information you share with us through this website.

Last updated: January 2024

Information We Collect

RSIPL INDIA collects information that you provide directly through our website forms, including contact enquiries, RFQ submissions, and vendor registrations. This may include your name, company, email, phone, project details, and company profile information. We also collect basic technical information such as browser type and pages visited for site analytics.

How We Use Your Information

We use the information you provide to respond to your enquiries, evaluate project requirements, process vendor registrations, and communicate with you about potential business opportunities. We do not sell or rent your personal information to third parties.

Information Sharing

RSIPL INDIA may share your information with trusted partners and subcontractors involved in project delivery, only to the extent necessary for business operations. All such sharing is governed by confidentiality expectations and applicable regulations.

Data Security

We implement appropriate technical and organisational measures to protect your information against unauthorised access, alteration, disclosure, or destruction. Access to personal information is restricted to authorised personnel with legitimate business needs.

Cookies & Analytics

Our website may use basic cookies and analytics to understand site usage and improve user experience. You can control cookies through your browser settings. Disabling cookies may affect some site functionality.

Your Rights

You may request access to, correction of, or deletion of your personal information held by RSIPL INDIA. To exercise these rights, contact us at info@rsiplindia.com.

Third-Party Links

Our website may contain links to third-party websites. RSIPL INDIA is not responsible for the privacy practices or content of external sites. We encourage you to review the privacy policies of any third-party sites you visit.

Contact Us

For questions about this privacy policy or our data practices, contact us at info@rsiplindia.com or through our Contact Us page.

Terms & Conditions

These terms govern your use of the RSIPL INDIA website. Please read them carefully before using our services.

Last updated: January 2024

Acceptance of Terms

By accessing and using the RSIPL INDIA website, you accept and agree to be bound by these Terms & Conditions. If you do not agree with any part of these terms, please do not use our website.

Use of Website

You may use this website for lawful purposes only. You agree not to use the site in any way that could damage, disable, or impair the website or interfere with any other party's use. Unauthorised use, scraping, or reproduction of content is prohibited.

Information Accuracy

RSIPL INDIA strives to provide accurate and current information on this website. However, we make no warranties regarding the completeness, accuracy, or reliability of any content. Project capabilities, certifications, and service descriptions may be updated without notice.

RFQ & Form Submissions

Submission of an RFQ, contact enquiry, or vendor registration through this website is for preliminary project review and does not constitute contractual acceptance, binding commitment, or service guarantee by RSIPL INDIA. All formal engagements are governed by separate written agreements.

Intellectual Property

All content on this website, including text, graphics, logos, and design elements, is the property of Ramsang Infrastructure Pvt. Ltd. or its content providers and is protected by applicable intellectual property laws. Unauthorised use or reproduction is prohibited.

Third-Party Links

This website may contain links to third-party websites for reference and convenience. RSIPL INDIA does not endorse or control third-party content and is not responsible for the accuracy or reliability of external sites.

Limitation of Liability

RSIPL INDIA shall not be liable for any direct, indirect, incidental, or consequential damages arising from your use of this website or reliance on any information provided. Your use of the site is at your own risk.

Updates to Terms

RSIPL INDIA may update these Terms & Conditions at any time. Changes will be posted on this page with an updated date. Continued use of the website after changes constitutes acceptance of the revised terms.
